**Medisoft Clinical | Proven Technology to Manage Your Practice**

Medisoft® Clinical from eMDs combines the practice management (PM) features of Medisoft with a proven, certified electronic health record (EHR) that has helped thousands of practices improve quality of care and financial performance. Because it is specially designed for Medisoft users, Medisoft Clinical simplifies your EHR implementation with a seamless upgrade that won't put your cash flow at risk.

**Seamless Practice Management Workflow**

Practice management in Medisoft Clinical is designed to help your practice maximize your revenue as you navigate an increasingly difficult regulatory landscape as well as a shift towards patient responsibility.

Medisoft's flexible scheduling workflow and its customizable charge entry and claims submission functions allow you to tailor the system to meet exactly your practice's needs.

**One Touch Sets Your Patient Chart In Motion**

The unique design of Medisoft Clinical's EHR allows your physicians the ease of a single-screen workflow, where the information they enter into their patient notes automatically appears in the appropriate area of the patient's chart as discrete, reportable data.

Best of all, when the encounter is over, coding information seamless flows to the billing staff in Medisoft.

Using fully customizable templates and Medisoft Clinical's Bright Note Technology™, physicians have the freedom to focus on their patients and let the data take care of itself.

**Take care of your practice and patients. We'll worry about your software.**

Simply Better EHR, Practice Management, Revenue Cycle, and Credentialing Services.

# What's New in Medisoft Clinical?

## Online Appointment Scheduling

New with Medisoft Clinical, your practice can allow patients to schedule and request appointments right from your website. As they do so, they can do demographic form entry, which will speed up the patient intake process once the patient arrives for their appointment. As the world continues to move online, patients demand the same from their practices. Medisoft Clinical can help you do just that.

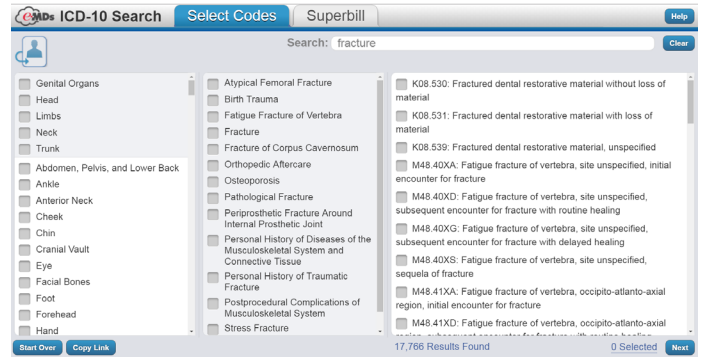

## Integrated Appointment Reminders

Medisoft Clinical's new partnership with AutoRemind offers practices the ability to send appointment reminders to patients scheduled for future appointments through either phone calls, texts, or secure emails. As patients confirm their appointment, Medisoft Clinical will note that confirmation in the system for staff. The AutoRemind portal can also be used to assist with the patient recall process.

\*Additional monthly fees apply.

## ICD-10 Search Tool

Insurance carriers are starting to enforce the selection of more specific ICD-10 codes. Luckily, Medisoft Clinical can help with its new ICD-10 Search Tool. The tool's natural language query allows users to search the ICD-10 library by code, plain language description, or even by clicking on visual diagrams. Don't let your cashflow be affected by changing coding requirements!
